DonRiver's Mobile Solutions Practice

DonRiver builds, maintains, and operates mobile solutions for Mobile Network Operators, Financial Institutions, and Value Added Services Providers.

Our Clients:

- **Mobile Network Operators** – We help operators generate new revenue streams with our DonRiver Value-Added Mobile Applications
- **Financial Institutions** – We provide banks and remittance providers with mBanking solutions that allow customers to check account balances, transfer money, and pay bills from their mobile devices.
- **mWallet Vendors** – We build and operate mWallet solutions for mWallet Vendors that enable customers to conduct peer-to-peer transfers, mobile commerce (purchases & payments), and mobile remittances

Our Services:

- **Business & Strategy Consulting:** We provide IT strategy, business case development, program management, and technology and industry insights to help clients make the right mobile technology investments.
- **Solution Delivery:** We work closely with our clients to understand their technology solution needs, and we follow through to design and build innovative business solutions based on leading technologies, platforms and standards
- **Application Management & Outsourcing:** For those clients looking to reduce technology operating costs or fill resource gaps, we offer skilled personnel to manage & support client software solutions both on & off-shore

Our Software Platforms:

- **Money Transfer CRM & Operations Portal:** Our web based platform allows Mobile Network Operators and Financial Institutions to manage and support Money Transfer operations including CRM, Trouble Management, Billing, and Reporting.
- **Service Delivery Platform:** Our Service Delivery Platform allows Mobile Network Operators and Financial Institutions to create, deploy, and bill for Value Added Services. Services are delivered through our SDP's Service Oriented Architecture (SOA), which includes Web Services, Multi Device Support, Security, Email & SMS Messaging, Workflow Automation, and Back Office Integration API's & Adaptors.
